DETAILED ACTION

Claim Objections

1. Claims 4-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Henry in US Patent 2164242 in view of Disher in US Patent 6015077. Henry teaches an umbrella carrier comprising attachment means (14 and 16), a holster like perforated (at 11) support (M) in the form of a substantially cylindrical tube (Best seen in Figure 3). Henry fails to teach a lining. Disher teaches an umbrella support having a lining (12) of water repellant porous fabric (See Column 4, lines 4-19) in the form of a sleeve. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the device on Henry by adding a fabric sleeve as taught by Disher to the interior of the device in order to "draw or wick moisture away from the umbrella" (as taught by Disher in Column 4, lines 18-19).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stanley, Jackson, Sipperly, Williams, Weber and Ford teach umbrella holders. Kohn teaches a cylindrical holder adapted to mount to luggage.
